

LED DOCK LIGHTS SAVE ENERGY AND CAN TAKE THE ABUSE AT THE LOADING DOCK

Klatt Equipment is partnering with all of our customers to save energy and provide dock lights that can be used at even the harshest loading docks

This LED dock light can save hundreds of dollars each year by using a 16 watt light bulb as a replacement for your standard 250 watt light bulb

This allows our customers to illuminate their loading dock areas for maximum safety.

Light specifications

- Cast aluminum
- Small size minimizes impact
- Cool to touch
- Impact resistant Lens clear acrylic (no glass)
- 50,000 hours average life
- Suitable for wet locations (IP 65 rated)
